Geophysical journal subject index by volume 92

Aftershocks

Lleyn earthquake of 1984 July 19: aftershock sequence and focal mechanism (Marrow, P.C., Walker, A.B.), **92**, 486

Anisotropy

The Chinese loess in Xifeng, II. A study of anisotropy of magnetic susceptibility of loess from Xifeng (Liu, X., Xu, T., Liu, T.), **92**, 349
Seismograms in stratified anisotropic media–I. WKBJ theory (Garmany, J.), **92**, 365
Seismograms in stratified anisotropic media–II. Uniformly asymptotic approximations (Garmany, J.), **92**, 379
Strain-induced AMS in the granite of Flamanville and its effects upon TRM acquisition (Cogné, J.P.), **92**, 445

Arctic

Canadian expedition to study the Alpha Ridge complex: results of the seismic refraction survey (Asudeh, I., Green, A.G., Forsyth, D.A.), **92**, 283

Attenuation

Attenuation of multiple *ScS* in various parts of the world (Chan, W.W., Der, Z.A.), **92**, 303

Australasia

A magnetotelluric and magnetovariational traverse across the New Zealand subduction zone (Ingham, M.R.), **92**, 493

Body waves

A ray-Kirchhoff method for body-wave calculations in inhomogeneous media: theory (Zhu, T.), **92**, 181
Analysis of amplitude and travel-time anomalies for short-period *P*-waves from NTS explosions (Lynnes, C.S., Lay, T.), **92**, 431

China

The Chinese loess in Xifeng, I. The primary study on magnetostratigraphy of a loess profile in Xifeng area, Gansu province (Liu, X., Liu, T., Xu, T., Liu, C., Chen, M.), **92**, 345
The Chinese loess in Xifeng, II. A study of anisotropy of magnetic susceptibility of loess from Xifeng (Liu, X., Xu, T., Liu, T.), **92**, 349

Core–mantle boundary

Multiple scattering by topographic relief with application to the core-mantle boundary (Doornbos, D.J.), **92**, 465

Cracked media

Cracked media, Poisson's ratio and the structure of the upper oceanic crust (Shearer, P.M.), **92**, 357

Crustal structure

Canadian expedition to study the Alpha Ridge complex: results of the seismic refraction survey (Asudeh, I., Green, A.G., Forsyth, D.A.), **92**, 283

Earthquakes

Lunar and solar periodicities of large earthquakes: Southern California and the Alaska–Aleutian Islands seismic region (Shirley, J.H.), **92**, 403
Lleyn earthquake of 1984 July 19: aftershock sequence and focal mechanism (Marrow, P.C., Walker, A.B.), **92**, 486

Earthquake seismology

3-D acoustic modelling and imaging for earthquake data (McMechan, G.A., Wen, J., Morales, J.A.), **92**, 339

Earthquake source mechanisms

Source mechanisms of four recent earthquakes along the Azores–Gibraltar plate boundary (Grimison, N.L., Chen, W.), **92**, 391

Earth's core

Transport properties of liquid metals and viscosity of the Earth's core (Poirier, J.P.), **92**, 99

Elasticity

Lithospheric flexure and deformation-induced gravity changes: effect of elastic compressibility and gravitation on a multilayered, thick-plate model (Zhang, J., Wong, T.), **92**, 73
Wave propagation within random packings of spheres (Walton, K.), **92**, 89
Cracked media, Poisson's ratio and the structure of the upper oceanic crust (Shearer, P.M.), **92**, 357

Elastic wave theory

Computation of body-wave seismograms in absorbing 2-D media using the Gaussian beam method: comparison with exact methods (Weber, M.), **92**, 9
A ray-Kirchhoff method for body-wave calculations in inhomogeneous media: theory (Zhu, T.), **92**, 181
Multiple scattering by topographic relief with application to the core–mantle boundary (Doornbos, D.J.), **92**, 465

Elastodynamics

Wave propagation within random packings of spheres (Walton, K.), **92**, 89
Elastodynamics of a quarterspace with one boundary semi-rigid and the other stress-free (Sahay, P.N., Capri, A.Z.), **92**, 235

Electrical conductivity

The use of invariant impedances in magnetotelluric interpretation (Ingham, M.R.), **92**, 165

Electromagnetic induction

An inversion method of Gel'fand–Levitan type for the electromagnetic induction problem (Bassom, A.P., Jady, R.J.), **92**, 111

Europe

Reference gravity stations on the IGSN71 standard in Britain and Greece (Hipkin, R.G., Lagios, E., Lyness, D., Jones, P.), **92**, 143

Explosion seismology

Seismic *P*-waves from Novaya Zemlya explosions: seeing double! (Stewart, R.C., Marshall, P.D.), **92**, 335

Fault-plane solutions

Source mechanisms of moderate-size earthquakes and stress orientation in mid-plate South America (Assumpção, M., Suárez, G.), **92**, 253

Fourier transforms

Logarithmic Fourier transformation (Haines, G.V., Jones, A.G.), **92**, 171

Geoid

Bouguer anomalies and the geoid: a reassessment of Stokes' method (Hipkin, R.G.), **92**, 53
Gravity field mapping from satellite altimetry, sea-gravimetry and bathymetry in the Eastern Mediterranean (Arabelos, D., Tscherning, C.C.), **92**, 195

Geomagnetic reversals

Derivations of the equation for the field lines of an axisymmetric multipole (Jeffreys, B.), **92**, 355

Geomagnetic secular variation

Non-longitudinal drifts of the Earth's magnetic field (Ostrowski, J.A.), **92**, 149

Geomagnetic variations

Global scale of the day-to-day variability of *Sq* (Hibberd, F.H., Davidson, R.E.), **92**, 315

Geomagnetism

Bayesian inference in geomagnetism (Backus, G.E.), **92**, 125

Gravity

Lithospheric flexure and deformation-induced gravity changes: effect of elastic compressibility and gravitation on a multilayered, thick-plate model (Zhang, J., Wong, T.), **92**, 73
Reference gravity stations on the IGSN71 standard in Britain and Greece (Hipkin, R.G., Lagios, E., Lyness, D., Jones, P.), **92**, 143
Remarks on the inverse gravimetric problem (Barzaghi, R., Sansò, F.), **92**, 503

Gravity field

Gravity field mapping from satellite altimetry, sea-gravimetry and bathymetry in the Eastern Mediterranean (Arabelos, D., Tscherning, C.C.), **92**, 195

Green's functions

Elastodynamics of a quarterspace with one boundary semi-rigid and the other stress-free (Sahay, P.N., Capri, A.Z.), **92**, 235

Heat flow

3-D numerical modelling of the conductive heat flow of SW England (Sams, M.S., Thomas-Betts, A.), **92**, 323

Inverse theory

Smoothing seismic tomograms with alpha-trimmed means (Gersztenkorn, A., Scales, J.A.), **92**, 67
Bayesian inference in geomagnetism (Backus, G.E.), **92**, 125
Remarks on the inverse gravimetric problem (Barzaghi, R., Sansò, F.), **92**, 503

Inversion

An inversion method of Gel'fand–Levitan type for the electromagnetic induction problem (Bassom, A.P., Jady, R.J.), **92**, 111

Magnetotellurics

The use of invariant impedances in magnetotelluric interpretation (Ingham, M.R.), **92**, 165
A magnetotelluric and magnetovariational traverse across the New Zealand subduction zone (Ingham, M.R.), **92**, 493

Natural modes of the Earth

Asymptotic solutions to the static deformation of the Earth – I. Spheroidal mode (Okubo, S.), **92**, 39

Normal modes of the Earth

A new formalism for the effect of lateral heterogeneity on normal modes and surface waves—I: isotropic perturbations, perturbations of interfaces and gravitational perturbations (Snieder, R., Romanowicz, B.), **92**, 207

Palaeomagnetism

Some observations of the gyroremanent magnetization acquired by rocks in a rotating magnetic field (Noel, M.), **92**, 107
Magnetism of igneous rocks from the Tourmakeady and Glensaul inliers, W. Ireland: mode of emplacement and aspects of the Ordovician field pattern (Deutsch, E.R., Storetvedt, K.M.), **92**, 223
The Chinese loess in Xifeng, I. The primary study on magnetostratigraphy of a loess profile in Xifeng area, Gansu province (Liu, X., Liu, T., Xu, T., Liu, C., Chen, M.), **92**, 345
A magnetic and petrological study of some Permian Aeolian red sandstones (Maslanyj, M.P., Collinson, D.W.), **92**, 421
Strain-induced AMS in the granite of Flamanville and its effects upon TRM acquisition (Cogné, J.P.), **92**, 445
On the origin of PSD moment in magnetite (Sugiura, N.), **92**, 479

Phase transitions

Validity of the Sutherland–Lindemann law and melting temperatures in the Earth's interior (Mulargia, F., Quareni, F.), **92**, 269

Refraction seismology

Application of Gaussian beam method in refraction seismology – Urach revisited (Weber, M.), **92**, 25

Rock magnetism

Magnetism of igneous rocks from the Tourmakeady and Glensaul inliers, W. Ireland: mode of emplacement and aspects of the Ordovician field pattern (Deutsch, E.R., Storetvedt, K.M.), **92**, 223

Seismicity

Lunar and solar periodicities of large earthquakes: Southern California and the Alaska–Aleutian Islands seismic region (Shirley, J.H.), **92**, 403

Seismic stress

Seismic wave propagation through material containing partially saturated cracks (Hudson, J.A.), **92**, 33
Prediction of failure times in the Earth for a time-varying stress (Main, I.), **92**, 455

Seismic tomography

Smoothing seismic tomograms with alpha-trimmed means (Gersztenkorn, A., Scales, J.A.), **92**, 67

Seismology

Seismic wave propagation through material containing partially saturated cracks (Hudson, J.A.), **92**, 33
A new formalism for the effect of lateral heterogeneity on normal modes and surface waves—I: isotropic perturbations, perturbations of interfaces and gravitational perturbations (Snieder, R., Romanowicz, B.), **92**, 207

South America

Source mechanisms of moderate-size earthquakes and stress orientation in mid-plate South America (Assumpção, M., Suárez, G.), **92**, 253

Southern California, Alaska

Lunar and solar periodicities of large earthquakes: Southern California and the Alaska–Aleutian Islands seismic region (Shirley, J.H.), **92**, 403

Synthetic seismograms

Computation of body-wave seismograms in absorbing 2-D media using the Gaussian beam method: comparison with exact methods (Weber, M.), **92**, 9
Application of Gaussian beam method in refraction seismology – Urach revisited (Weber, M.), **92**, 25
Seismograms in stratified anisotropic media–I. WKBJ theory (Garmany, J.), **92**, 365
Seismograms in stratified anisotropic media–II. Uniformly asymptotic approximations (Garmany, J.), **92**, 379

TRM

Strain-induced AMS in the granite of Flamanville and its effects upon TRM acquisition (Cogné, J.P.), **92**, 445
On the origin of PSD moment in magnetite (Sugiura, N.), **92**, 479

Viscosity

Transport properties of liquid metals and viscosity of the Earth's core (Poirier, J.P.), **92**, 99
